

Free Open University Courses

The Open University are offering fully-funded micro-credential courses, with the support of the Scottish Funding Council Upskilling Fund. The Open University is committed to supporting the upskilling and reskilling of individuals and organisations by offering a number of limited places.

The link to these courses can be found here: <http://www.open.ac.uk/courses/choose/scotland-micro>

Please note: To apply for a free place, please use the link and complete the short application form by Friday 14 Feb (applicants must apply via this landing page and not directly on FutureLearn)

University of Strathclyde & National Subsea Research Initiative (NSRI)

The University of Strathclyde and the National Subsea Research Initiative (NSRI) have developed a new foundation level 2-day online course on offshore renewable energy. This course may be of interest to individuals and businesses looking to move into renewables or transition from another energy industry (such as oil and gas).

Course - Offshore Energy: from Oil & Gas to Renewables - [View course flyer](#)

It is aimed at professionals including designers, developers and contractors, to help understand the technical and business aspects of the offshore renewables sector as Scotland adapts to a Net Zero future. The course, delivered by experts from across the sector, examines the full lifecycle of offshore renewable energy assets, from design, manufacture, installation, power generation and ultimately decommissioning.

The course, delivered over the Zoom platform, takes place over two days, from 25-26 February 2021, with a morning and afternoon session each day.

For more information and to book your place, please visit the Subsea UK website <https://www.subseauk.com/12077/offshore-energy-from-oil-gas-to-renewables-strathclyde-university-nsri-and-subsea-uk-2-day-course>
